Professional Summary

Machine Learning Engineer with strong expertise in supervised and unsupervised learning, as well as deep learning techniques. Holder of the IBM Machine Learning Professional Certificate and the International AI Driving License. Skilled in statistical analysis, regression, and classification problems, including both tabular data classification and image classification. Experienced in building, evaluating, and optimizing machine learning models with a strong focus on real-world applications and performance-driven solutions.

Experienced in building interactive machine learning applications using Streamlit, including medical image classification applications.

Core Skills

- Programming: Python
- Statistical Analysis and Data Exploration

• Supervised Learning: Regression, Classification

• Unsupervised Learning Techniques

• Deep Learning and Neural Networks

• Image Classification using CNNs and Transfer Learning

• Handling Imbalanced Datasets

• Building ML Web Applications using Streamlit

• AutoCAD – 2D Drafting and Design

Tools & Technologies

• Pandas, NumPy, Matplotlib, Seaborn

• Scikit-learn, TensorFlow, Keras

• Streamlit for deploying machine learning and medical image classification applications

• GitHub, Jupyter Notebook, Google Colab

Certifications

• IBM Machine Learning Professional Certificate

https://www.coursera.org/account/accomplishments/specialization/PANWGJAUQLKE

• International AI Driving License

https://c.iaidl.org/IAIDL_Sz66vpN4

Professional Strengths

- Strong analytical and problem-solving mindset
- Solid understanding of machine learning theory and practice
- Ability to explain complex models and results clearly
- Focused on building scalable and efficient ML solutions
